THE RESIDENCE

The Avalon at Winter Park

A two-story, 5,500-square-foot custom residence with five bedrooms, five and a half baths and a three-car garage, coming soon to Forrest Road in Winter Park.

The plan centers on a large pivot entry door opening to the outdoor living spaces, with the pool, pergola and outdoor lounge set on one level at the rear of the home.

Upstairs, a great room with a wet bar and a club room open to a covered balcony for entertaining, and the primary suite is planned as a separate, generously sized retreat.

Renderings are artist's impressions. Design, finishes and specifications are preliminary and subject to change.

- 5,500 square feet on two stories
- 5 bedrooms · 5.5 baths · 3-car garage
- Pool, pergola and outdoor lounge
- Second-floor great room, wet bar and club room
- Synap Living OS built in during construction

SYNAP LIVING OS

Four systems, one brain

Every system in the home — energy, water, air and lighting — connects to a single intelligent layer built into the structure during construction, not added on afterwards.

Each owner also receives the original blueprints, build documentation and an owner's manual for every system, per the builder's transparency program.

- Energy — smart panel, battery backup and generator transfer switch, with circuit-level telemetry and real-time solar and battery monitoring
- Water — automatic shutoff, leak detection and flow analytics
- Air — hospital-grade purification, CO2 monitoring and auto-ventilation, better than MERV 16
- Lighting — Lutron controls, circadian programming, daylight harvesting and scene automation
